5. SUBJECT: Amendment No. 1 to Agreement No. ST5-745-3433 for Asphalt Rubber Crack Sealing

6. RECOMMENDATION: Staff recommends City Council approve Amendment No. 1 to Agreement No. ST5-745-3433 with Vincon Engineering Construction, LLC, for Asphalt Rubber Crack Sealing, in the amount of $500,000 for one (1) year.

7. BACKGROUND/DISCUSSION: Crack sealing is an important step in the repair process for our streets. Crack sealing protects the pavement structure by sealing cracks and preventing water from getting into and deteriorating the roadway base material. The crack repair process is accomplished by the means of high velocity compressed air and dust containment (typically by a vacuum apparatus) and then filling them with hot crack sealant material. This contract includes traffic control, cleaning, and filling of roadway cracks (see attached location map). The City provides the crack sealing material to save on crack fill material costs and the recommended contractor provides application.

8. EVALUATION PROCESS: On October 23, 2014, City Council approved an agreement with Vincon Engineering Construction, LLC, for Asphalt Rubber Crack Sealing for a one-year period with the option of four (4) one-year extensions. The vendor has agreed to extend for one (1) additional year at the same terms, conditions, and pricing.

Staff recommends extension of this agreement for the new term of December 1, 2015, through November 30, 2016. This is the first extension of the contract.
