

Frequently Asked Questions

Break Time Non-Resident Fee Policy & Registration FAQ

Q: What is the non-resident policy?

A: The new policy establishes procedures for determining non-resident fees for Aquatics, Parks and Recreation programs, facilities and services. Due to increased fiscal demands for new and expanded services, coupled with demands from non-residents, this policy is necessary to maintain existing quality levels of service for Chandler residents. The City's Community Services Department is committed to offering residents a wide range of services and activities at the lowest overall cost. This new non-resident fee policy has been implemented by the Parks & Recreation Board to apportion to non-residents an equalized fee so they contribute to the funding of aquatics, parks and recreation programs, facilities and services on an equitable basis with residents that pay City taxes.

Q: How is the non-resident fee determined?

A: Non-resident fees are 35% higher than the resident rate and are then rounded up to the next dollar.

Q: How will residents be verified so they don't pay the non-resident fee?

A: A person is considered a resident by maintaining a residence or owning a business within the city limits of Chandler. Residency can be verified by staff based on one of the following forms of ID:

- *Picture ID with local address*
- *Current (within last month) water or utility bill*
- *Voter registration card*
- *Hunting/fishing license*
- *Current vehicle registration*
- *Business license and check imprinted with a Chandler address*

When customers register in person or use the drop-off method, a customer service representative will request a copy of one of these documents to confirm residency. For mail-in registration, customers will be reminded via the Break Time registration language and by future follow-up correspondence from staff to receive the proper form of ID. All copies of customer information received by staff will be shredded immediately following residency verification in the recreation registration software database.
