Any additional herbicide needed, other than the 4 applications of pre-emergent and post-emergent herbicide, CONTRACTOR shall be required to purchase additional applications at their own expense.

All herbicide uses other than mentioned above will be considered a management tool and therefore excluded from reimbursement, i.e. using herbicides instead of hoeing to eliminate weeds. CONTRACTOR shall submit applicable material safety data sheets to Contract Administrator/designee prior to use, a letter naming the herbicides that are proposed for use, where and how they are to be applied, and a copy of the product label. CONTRACTOR shall complete and furnish copies of a herbicide Spray Log with the billing invoices to Contract Administrator/designee on a monthly basis.

Roundup will be used as needed for a systemic weed killer. Surflan will be used as the pre-emergent. No other chemical will be used unless approved by the Contract Administrator/designee. All labor and material to control the weeds will be supplied by the CONTRACTOR. Weeds will also be controlled manually by hoe. All weeds controlled by chemicals must be removed or raked out.

The CITY reserves the right to sample and test of pre-emergent to ensure compliance with requirements, at any time during the application of herbicides.

5.2 Pre-Emergent Herbicide Application

Apply Gallery herbicide to all non-turf and open areas per label instruction: one Summer application (July 15 – August 15) and one Winter application (February 15 - March 15). Before application, areas must be free from weeds. Schedule of Gallery herbicide applications must be submitted to the Parks Maintenance representative at least five (5) working days prior to application. Failure to submit schedule as prescribed may be grounds for termination of contract.

5.3 Post-Emergent Weed Control - Non-Turf Areas

All weeds are to be controlled by chemical means before reaching three (3) inches high. Weeds are not to be controlled by mechanical means (hoeing).

Summer - Weeds to be controlled by the use of Monsanto brand "Roundup" herbicide per label instructions.

Winter - Weeds to be controlled by Roundup Quick Pro in the granite areas.

6. **AERATION (applies to Municipal Utilities Only)**. Aeration of all turf areas will be accomplished in April of each year and will be accomplished using standard aeration equipment supplied by the CONTRACTOR. Equipment used must be approved by the Contract Administrator/designee prior to use.

7. **MOWING (applies to Municipal Utilities Only)**. Bermuda grass shall be mowed weekly during active growing season and as required during the winter months. The Contract Administrator/designee will regulate the frequency of the mowing. Turf shall be mowed and edged to not less than 1" in height and no more than 3" in height, starting short in the spring and progressively mowing higher during the summer to the fall. The height of cutting to be maintained consistently to insure against mower burns or gouging. Grass clippings will be dispersed evenly over the turf or removed if large piles remain. Turf will be edged

and trimmed as necessary to maintain a neat appearance. Note: Winter months will be considered from November 1 to April 1.

8. **IRRIGATION MAINTENANCE (applies to Municipal Utilities Only).** CONTRACTOR shall be responsible to see that all plant materials planted within agreement boundaries or under CONTRACTOR's care at other locations owned by CITY receive the proper amount of water to maintain health and vigor. If special watering is needed for any area, it is the responsibility of CONTRACTOR to bring it to the Contract Administrator/designee's attention in writing. Plant materials that are damaged due to lack of water or over watering when under CONTRACTOR's control shall be replaced or returned to health at the CONTRACTOR's expense. Within four (4) weeks from beginning of contract, CONTRACTOR shall submit to the Contract Administrator/designee the following information for plant replacement and recovery, and an inventory of all irrigation systems to ensure they are working properly.

When watering, CONTRACTOR shall not water to a point of runoff. If runoff is occurring, adjustment of the watering schedule or use of a wetting agent may be necessary.

For efficient use of water, the guidelines below should be followed, unless the CONTRACTOR can justify deviation from the guidelines to the Contract Administrator/designee's satisfaction:

1. Adjustment must be made to maintain growth at the desired rate.
2. Sprinkling between 9:00 p.m. and 6:00 a.m. is preferred.
3. Other hours must be approved by the Contract Administrator/designee.

All sprinkler systems shall be operated at an appropriate seasonal frequency using the least amount of water necessary to maintain the growth, health and vigor of all plant materials.

When sprinkler systems are out of service, CONTRACTOR shall be required to water by hand or by other means in accordance with plant needs and it shall be considered routine work.

CITY will assume the cost for hand watering done in accordance with the special watering provisions stated below upon written notification from CONTRACTOR of system failure involving electric supply and/or water supply from CITY's main lines.

CONTRACTOR shall maintain a log of current sprinkler timing at every site and a copy shall be given to the Contract Administrator/designee. A copy of the log shall be maintained at each site, properly protected from the elements. The log shall include, but not be limited to, the following items: (a) days of week system is on; (b) start times; (c) station timing; (d) station description information.

All sprinkler systems in the turf areas shall be turned off by CONTRACTOR's personnel when rain occurs or is forecast with some certainty, for more than a one-day period.

When requested by CITY, special watering will be paid for at the rate agreed upon by extra work authorization. The payment for special watering shall only be made for reasonable amounts of time required to set up equipment, adjust for coverage, occasional monitoring and breakdown of equipment. Equipment and methods used for special watering will be subject to approval by the CITY.

Some manual systems will be watered by CONTRACTOR based on the required rate and frequency necessary for the season and to maintain healthy plant material.

9. **SPRINKLER MAINTENANCE (applies to Municipal Utilities Only).** CONTRACTOR shall maintain sprinkler systems so that all component features are operating as designed. Pumps, backflow prevention units, chemical injectors, controllers, valves, pressure regulators, filters, water lines, sprinklers, bubblers, and trickle emitters shall be checked on a bi-weekly basis and serviced as required. Repairs shall be made within two (2) days unless a written authorization for delay is issued by the CITY.

CONTRACTOR shall be required to employ at least one qualified Sprinkler Technician repair person and/or more as required to maintain and repair all irrigation systems within the boundaries described herein. The Sprinkler Technician and the Lead Maintenance person will not be the same person. The CITY will certify the skill level of all Sprinkler Technicians that will work on the C's sprinkler maintenance agreement. This certification will be accomplished by a "hands-on" situational exercise conducted by the CITY. CONTRACTOR may certify as many individuals as desired to successfully perform the requirements described herein. Failure to successfully certify Sprinkler Technicians shall be grounds for termination of this agreement in its entirety.

The situational exercises will consist of nine tasks related to establishing and maintaining a properly functioning sprinkler system. The nine tasks consist of:

- 1) Repairing a malfunctioning valve
- 2) Repairing a broken wire with a pin-tite connector
- 3) Adjusting the flow on a control valve
- 4) Check the Ohm reading on a solenoid valve for proper operation
- 5) Diagnosing a controller with no display
- 6) Programming an Irritrol MC plus controller
- 7) Check station voltage on the controller
- 8) Adjust radius and arcs on sprinkler heads
- 9) Install a new nozzle to an existing sprinkler head

Each task will be rated "pass/Not pass" by an authorized CITY employee. To achieve certification the applicant must receive a passing rating on **ALL** tasks.

9.1 Time Frame for Sprinkler Technicians qualifications - Beginning of Agreement. Testing to qualify Sprinkler Technicians from CONTRACTOR will be completed prior to City Council approval. If any applicant fails the test, they will be retested in five (5) days. Should CONTRACTOR fail to qualify a Sprinkler Technician, the agreement will be subject to termination and may be awarded to the next responsive CONTRACTOR.

9.2 Mid-term. Should CONTRACTOR lose their qualified Sprinkler Technician during the course of the agreement, they will be retested in five (5) working days. If the applicant fails the test a second time, they will not be retested. If the CONTRACTOR has failed to qualify a Sprinkler Technician in a thirty (30) day time period, the agreement is subject to termination for cause. **CONTRACTOR is encouraged to qualify back-up Sprinkler Technicians.**

The City will pay for or provide the following parts for repair of the sprinkler systems: Controllers, electric valves, vacuum breakers, turf spray heads. All other parts shall be supplied by CONTRACTOR. All of the broken or defective parts being replaced by CITY must be returned to Contract Administrator/designee.

If sprinkler equipment presently in service malfunctions but is repairable, it shall be CONTRACTOR's responsibility to supply the labor to repair all such equipment at no additional cost to CITY. If timer malfunctions and cannot be repaired in the field CONTRACTOR shall notify Contract Administrator/designee to determine the best course of action.

All new equipment installed shall have prior written approval from Contract Administrator/designee. Equipment removed shall be marked for identification and returned to the City along with all excess parts. Installation or replacement equipment, whether new or rebuilt, shall be considered routine work.

Payment for sprinkler maintenance shall be part of the monthly cost for each area as stated herein. Special repairs or watering shall be paid for at the price agreed upon by extra work authorization.

10. **FERTILIZING.** TURF AREAS - February 14 to February 28 - apply fertilizer 16-20-0 at the rate of 4.5 pounds per 1,000 square feet to assure 1 1/2 pounds of nitrogen per 1,000 square feet. June 1 to July 1 - apply ammonium phosphate 16-20-0 at the rate of 4.5 pounds per 1,000 square feet. Water fertilizer into the soil immediately after application. CONTRACTOR shall notify Contract Administrator/designee of date of each application and location treated.
11. **GRANITE.** CONTRACTOR shall fertilize all other plant material on an annual basis during the month of March. All plants shall be observed for signs of nutrient deficiencies and treated to correct deficiencies throughout the year. The Contract Administrator/designee shall be notified in writing whenever granite is to be added to an area.
12. **TRIMMING.** CONTRACTOR shall trim all shrubs and hedges in such a manner that they present a pleasing appearance – year round. This may require more than 1 trimming. See Park, Right of Way, Municipal Tree and Shrub Pruning Specifications page, 45.
13. **PRUNING.** CONTRACTOR shall prune all shrubs and groundcover in an acceptable and methodical manner: i.e., selective pruning in keeping with good horticultural practices. Pruning of all shrubs and groundcover shall be limited to containment of vegetative growth to the inside edge of curb lines, sidewalks (if any) and a maximum of 24 inches above height of grade (street surface) for shrubs within the sight distance triangle. Shrubs in R.O.W. or basins within 10 feet of a wall shall be kept at the height not to exceed the wall. All trees shall be pruned by approved method to keep tree branches out of street right-of-way, for 13'6" high vertical clearance on major streets and off sidewalk for 8' clearance. Pruning shall also include the removal of dead, dying, diseased and broken portions; not to exceed 25 feet in height, of each plant. If replacement is necessary plant materials will be supplied by the City except when due to negligence of CONTRACTOR. See Park, Right of Way, Municipal Tree and Shrub Pruning Specifications page,45.

Pruning shall be performed in such a way that plant material does not create a visibility obstruction to vehicular traffic. The City shall reserve the right to determine when plant material creates a visibility obstruction.

Height of trimming of shrubs in continuous areas will be consistent in height. Height of trimming will be determined by the City.

Pruning, elevating and shaping of trees shall be limited to small trees, regardless of what their anticipated mature height may be. Pole saws and pruners should be used to meet height requirements as specified in this agreement. Pruning shall be performed following accepted practices, not stubs.

CONTRACTOR shall have good quality, appropriate hand tools available at all times. CONTRACTOR shall keep his tools in a clean, operative and sharp condition and be sterilized periodically. If disease/infection is suspected or known within a certain plant(s), CONTRACTOR shall sterilize cutting tools between each cut. All hand shears and loppers shall be a type having two (2) cutting edges. Anvil type pruners are not acceptable. All branches and clippings shall be removed from site at completion of each work day.

All trees shall be pruned annually but may require touch up trimming and pruning throughout the year on an as needed basis. Pruning standards shall follow the ISA Western Chapter Pruning Standards for correct pruning. Pruning over 25' in height will be pruned as requested. City will contract this pruning separately or ask CONTRACTOR to submit a separate quote for this work. An ISA Certified Arborist or Certified Tree Worker must be available to train, oversee, and supervise all pruning of trees.

Palm Trees, **regardless of height**, shall have frond stubs and seed pods removed no later than in July, but do not require skinning. More than one trimming of palms may be required. This will be on an as needed basis at no additional cost to CITY.

CONTRACTOR shall keep all trees that are staked at the beginning of the agreement, and any trees replaced during the agreement period, staked according to CITY specifications: Two 8-foot 2" x 2"

redwood stakes on each side of the tree approximately 18" apart with two hose protected wire guys between trees; and stakes firmly driven into the ground 12" - 18". Additionally, as trees mature, stakes shall be removed for the health of the tree.

Immediately after wind storms, CONTRACTOR shall prune, re-stake or remove trees (less than 25' in height), and remove all debris as required at no additional charge to the City. Trees in excess of 25' in height will be dealt with on an individual basis.

14. DISCING. Un-landscaped basins will be disked two (2) times during the agreement - in November and May. Disc depth is not to exceed 3" deep. Mowing will be required for any un-landscaped basin having sides too steep for disking.

15. BRUSH MOWING (applies to Municipal Utilities Only). Mowing of un-landscaped area outside block fence will occur four (4) times per year (every 3 months) in Jan, Apr, July, and October. Minimum height of cutting is 2". Dust shall be kept to a minimum. Canal area outside fence shall be sprayed with Reward for top kill of weeds during the months of March, July, and November.

16. XERISCAPE LANDSCAPED AREA INSTRUCTIONS PER ADDENDUM #1

The Xeriscape Demonstration Garden is a functional, user friendly space with desert adapted trees, shrubs, succulents and groundcovers and is designed to demonstrate a low maintenance landscape.

All pruning shall be performed following selective or natural pruning practices according to ANSI A300 standards. Exceptions are when these pruning practices conflict with City code requirements, i.e., branch height over sidewalks, etc.

Water Conservation will oversee all plant replacement. Contact Cathy Rymer at cathy.rymer@chandleraz.gov when plant replacement is necessary.

Water Conservation will manage watering schedule. Contact Cathy Rymer at cathy.rymer@chandleraz.gov if scheduling problems arise.

All drip system repair, maintenance, and management will be handled by the contractor as dictated by the contract.

17. MUNICIPAL UTILITIES DEPARTMENT (MUD). MUD administration site located at 975 E. Armstrong Way shall include the following services along with those stated within this specification under "Landscaped Wells & Facilities":

Park, ROW and Municipal Utilities Tree and Shrub Pruning Specifications

Tree and shrub pruning Specifications for General Parks, Right of Ways and Municipal Utility Sites.

All trees should follow the general pruning guide where 2/3 of a Pruned Tree is canopy and the lower 1/3 of the tree is open trunk. To promote health and non-suckering of the trees pruned we also never remove more than 25 % of the tree foliage at any one pruning. List below, CONTRACTOR will find some crude examples of what these trees may look like. This guide is not an all-inclusive guide that deals with all plant material found in the all areas, but is provided to help establish how plant material should be pruned in a professional and timely manner.

Young (less than 20 feet,) Desert trees, and Eucalyptus tree's all will need to be pruned to the guidelines in the months as follows. **1st time** Mid May through April, **2nd time** in July, & **3rd time** in October.

Young (Less than 20 feet), Pine trees, Oak tree's and deciduous tree's shall be pruned only 1 time each year in January, unless it is planted adjacent to a walkway or roadway and will be pruned as needed to keep walks and drives open.

Mature, (over 20 feet tall) Desert Tree's and Dalbergia Sissoo trees will be pruned in April to May the **1st time**, and October the **2nd time**.

Palms shall be pruned in July, with all fronts removed below the 10 and 2 o'clock positions as if looking at a wall clock. Note: do not over prune palms.

Shrubs and Ground Cover:

Ground covers: shall be pruned as needed to keep walkways clear, and pruned back in March as needed to remove die back and frost damage. *Note: Lantana shall be pruned completely to the ground each year in March.

Shrubs shall be pruned as follows:

- Mexican Birds of Paradise shall be pruned December through January to not more than 18" above the ground.
- Texas Sage's shall be pruned after blooms drop, starting in mid-November through January. Shall be pruned to 18" to 24" above ground.
- Cassias will be pruned before seed drop to 18" to 24" above ground, from mid-March through April.

- Oleanders shall be pruned 18" to 24" above ground from mid-March to through April.
- Bougainvilleas shall be pruned 18" to 24" above ground from mid-March through April.
- Ruellias shall be pruned to only 24" to 30" above ground from mid-March through April.
- Natal Plums shall be pruned 18" to 24" above ground from mid-March through April
- Brittle Bush shall be pruned 18" to 24" above ground in November.
- Sugar Bush shall be pruned hard as needed in November.
- Hesperalo requires little to no pruning; the flower stalks shall all be removed in November.

Desert Shrub as follows:

- Brittle Bush, Mallows, Mexican Primrose, Eremophilas, shall all be pruned to 12" or less in May.

Ornamental Grasses:

- All grasses shall be flat cut to ¾" above ground in April. Baling of ornamental grasses will not be acceptable.

PARKS & FACILITIES AREA

Trees and shrubs within these areas are needed to be more formal in nature.

Young and older trees should follow the general guidelines set forth in the regular guideline already discussed above. The only difference is that once the Trees are pruned to their individual specification they will be kept there by additional pruning throughout the growing season by additional pruning as needed and certainly within every 60 day of the growing cycle.

Shrub and ground cover should also follow the previous guidelines already discussed earlier. Pruning shall be maintained a minimum of every 60 days or as needed to keep the shrubs and groundcover acceptable and pleasant to look at throughout the year.
