MEMORANDUM **Planning Division – CC Memo No. 15-033**

DATE: MARCH 12, 2015

TO: MAYOR AND COUNCIL

THRU: RICH DLUGAS, CITY MANAGER RD
MARSHA REED, ASSISTANT CITY MANAGER
JEFF KURTZ, PLANNING ADMINISTRATOR
KEVIN MAYO, PLANNING MANAGER KM

FROM: SUSAN FIALA, CITY PLANNER SF

SUBJECT: ZUP14-0028 SPRINT AT ALMA SCHOOL AND ELLIOT

Request:	Use Permit approval to replace an existing wireless communication facility with a monopalm
Location:	3150 North Alma School Road, northwest corner of Alma School and Elliot roads
Applicant:	Jeffrey Quinn, Crown Castle for Sprint
Zoning:	Planned Area Development (PAD)

RECOMMENDATION

Planning Commission and Planning Staff, upon finding the Use Permit request to be consistent with the General Plan, recommend approval subject to conditions.

BACKGROUND

The request is for Use Permit approval to replace an existing wireless communication facility with a monopalm. The site is located at 3150 North Alma School Road within the Paseo del Oro center. Elliot Place condominiums is the nearest residential development, located approximately 52 ft. to the west. Commercial, office, retail, and a preschool are surrounding land uses.

The proposed monopalm is 42 ft. tall, measured to the top of antennas, and replaces a 55 ft. tall 'slim line' monopole in the same location. Existing antennas are concealed within a stealth canister and cannot accommodate the required antenna upgrade from 3G to 4G technology. Reduced height is to create a more natural palm tree to fit in with the surroundings.

The Zoning Code requires a Use Permit for wireless communication facilities in non-industrial zoning districts that do not utilize existing poles or towers.

A monopalm is a cell tower disguised as a palm tree. The monopalm would be a Date Palm design, having a minimum of 65 fronds, and the antennas would be painted to match the fronds. No exterior changes to the existing equipment enclosure are proposed. Equipment inside the enclosure is upgraded.

Within the immediate area, there are no other suitable alternatives for co-location of the wireless communication facility on existing poles or towers. An inventory of existing facilities, vertical towers, and structures was prepared by the applicant to assess alternative locations. The applicant determined the current location is the most feasible to continue to serve the area and a replacement of the facility meets the frequency requirements and locational service needs. The inventory is attached.

Photographic simulations illustrating existing views and proposed views of the wireless communication facility were provided by the applicant. The simulations depict the equipment enclosure and monopalm as viewed from several locations. A pineapple is illustrated in the photo-simulations, however, the elevations do not depict the pineapple. Planning Staff recommends adding the pineapple to the monopalm as a condition of approval.

DISCUSSION

Planning Staff finds the replacement of the monopole with a monopalm appropriate. The monopalm design is appropriate at this location given the presence of palms in the adjacent condominium development. The separation from the condominiums to the west is approximately 52 ft. The proposed monopalm is a replacement as well as a reduction of 13 ft. from the existing height. A new 55 ft. tall monopalm, within the same center, was approved on November 20, 2014, and located about 80 ft. to the southwest of the subject monopalm.

Planning Staff is of the opinion that permitting the monopalm at this specific location is consistent with the review factors examined as part of the Use Permit process.

PUBLIC / NEIGHBORHOOD NOTIFICATION

- This request was noticed in accordance with the requirements of the Chandler Zoning Code.
- A neighborhood meeting was held on January 26, 2015. No one other than the applicant attended.
- As of the writing of this memo, Planning Staff is not aware of opposition to this request.

PLANNING COMMISSION VOTE REPORT

Motion to Approve:
In Favor: 5 Opposed: 0 Absent: 2 (Cunningham, Pridemore)

RECOMMENDED ACTION

Planning Commission and Planning Staff, upon finding consistency with the General Plan, recommend approval of Use Permit, ZUP14-0028 SPRINT AT ALMA SCHOOL AND ELLIOT, subject to the following conditions:

1. Development shall be in substantial conformance with approved exhibits. Expansion or modification of the use beyond approved exhibits shall void the Use Permit and require new Use Permit application and approval.

2. A pineapple shall be added to the monopalm.

PROPOSED MOTION

Move to approve Use Permit, ZUP14-0028 SPRINT AT ALMA SCHOOL AND ELLIOT, subject to the conditions as recommended by Planning Commission and Planning Staff.

SCOPE OF WORK

1. THE WIRELESS COMMUNICATIONS FACILITY IS NOT INTENDED FOR HUMAN OCCUPANCY.
2. THIS FACILITY DOES NOT REQUIRE POTABLE WATER AND WILL NOT PRODUCE ANY SEWAGE.
3. CONTRACTOR SHALL VERIFY ALL PLANS AND EXISTING DIMENSIONS AND CONDITIONS ON THE JOB SITE AND SHALL IMMEDIATELY NOTIFY THE ENGINEER IN WRITING OF ANY DISCREPANCIES BEFORE PROCEEDING WITH THE WORK OR BE RESPONSIBLE FOR SAME.
4. THE SCOPE OF WORK CONSISTS OF MODIFYING THE EXISTING WIRELESS INSTALLATION:
   - INSTALLATION OF (1) NEW 42'-0" HIGH MONO-PALM STEALTH WITH A QUANTITY OF 65 FRONDS NOT TO EXCEED 47'
   - INSTALLATION OF (3) NEW PANEL ANTENNAS (APXVTM14-C-120)
   - INSTALLATION OF (3) NEW PANEL ANTENNAS (APXVSPP18-C-A20)
   - INSTALLATION OF (3) NEW RRH (PCS 1900MHz 4x45W-65MHz)
   - INSTALLATION OF (3) NEW RRH (TD-RRH8x20-25)
   - INSTALLATION OF (4) NEW EQUIPMENT CABINETS
   - INSTALLATION OF (1) NEW PPC CABINET
   - INSTALLATION OF (1) NEW HOFFMAN BOX
   - REMOVING EXISTING 55' STEALTH TOWER TO BE REPLACED

Existing Conditions

Sprint is committed to providing high quality, reliable wireless coverage to residents, visitors and businesses in the Chandler community. Part of this on-going commitment includes updating equipment from time to time to keep up with local demand and eliminate lapses in geographical coverage. Sprint currently operates on an existing WCF located at 3150 North Alma School Road in downtown Chandler. In response to increasing demand for 4G technology and increased bandwidth usage from businesses, consumers and emergency services, Sprint would like to upgrade its equipment at this location to adequately handle both these needs and expected future demand. The WCF is currently located on a parcel zoned commercial.

Details of Request

Sprint is currently providing 3G services from an existing monopolm. This application is a request to allow an upgrade to 4G equipment in addition to an upgrade to the WCF from a monopole to monopalm. The WCF upgrade will not only more effectively blend with local landscaping, but is a necessity as the upgraded equipment will not fit into the current outdated canister configuration.

The new monopalm disguise will be "date" style palm with 65 fronds. The proposed WCF is designed to have a lower 42' tower height (13' shorter than existing pole) to have a more aesthetically natural feel within the surrounding environment. The coax cables will be routed within the trunk of the palm, while the antennas and remote radios heads will be located in the fronds, painted to match.

New ground equipment will be housed in an existing compound surrounded by a 7' high brick wall to match adjoining architecture. No changes to the ground space.

The existing WCF does not contribute to any increase in vehicular traffic in the area and does not require any water, or solid waste services. There are no negatives to the existence of this WCF operating at the current location.

One vehicle may access the wireless communication facility once or twice a month, or in the event of a technical breakdown. This vehicle will use the existing access and parking at this site.

Feasibility Study

As will be seen on the included propogation maps, Sprint's current coverage can not be duplicated by collocating on any other existing structures in the immediate area. Below is an inventory of all Wireless Telecommunication Facilities within a 1 mile radius at or above the same height as Sprint's existing site. Utility poles are not included due to the fact that SRP does not allow antennas and RRHs to on their poles which require power to the units.

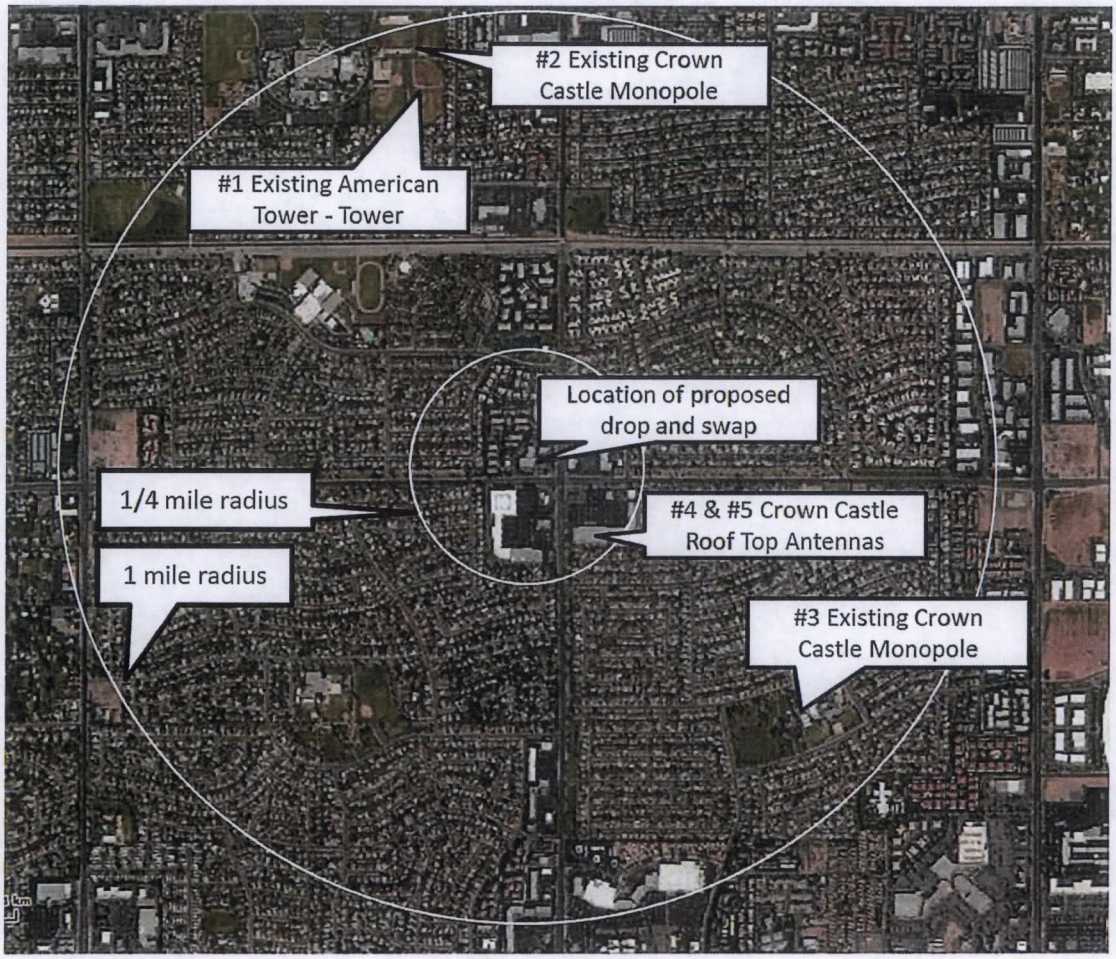
1. American Tower Corp: Dobson High (LAT 33.362683, LON -111865108) 104' RAD center. (.88) miles North of the proposed WCF. Collocation at this monopole is not feasible due to the close proximity of a tower at Mountain View where Sprint currently has placements.

2. Crown Castle: Mountain View (LAT 33.364000, Lon -111.865153) 104' RAD center. (.92) miles North of proposed WCF. Upgrading existing Sprint equipment on this tower is not feasible due to the distance away from target area. Antennas at this location will not fulfill the coverage needs that the new WCF meets.

3. Crown Castle: Sirrine Elementary (LAT 33.342749, Lon -111-850417) 50' RAD center. (.75) miles South East of proposed WCF. Upgrading existing Sprint equipment on this tower is not feasible due to the distance away from target area. Antennas at this location will not fulfill the coverage needs that the new WCF meets.

4. Crown Castle: AZChand_022693 (LAT 33.348100, LON -111.858650) 20' RAD center. Rooftop mounted. (.25) miles South East of proposed WCF. This site is not feasible as the RAD center is too low for the new equipment to effectively fulfill the coverage needs of the new WCF.

5. Crown Castle: AZChand_37 (LAT 33.348195, LON -111.858008), 20' RAD center. Rooftop mounted. (.25) miles South East of proposed WCF. This site is not feasible as the RAD center is too low for the new equipment to effectively fulfill the coverage needs of the new WCF.



Conclusion

As individuals, businesses and emergency service providers rely more and more on advanced technology to operate in modern times, it is essential that wireless service providers keep up with growing demands for the benefit of the community. Sprint is committed to leading the way in providing the best possible coverage. The proposed upgrade from Sprint's current monopole with 3G service to an upgraded monopalm with 4G service is the best possible coverage solution, from both an appearance standpoint to a service one. The location is optimal because Sprint is currently operating at this site and the transition of service will be seamless to the consumer in the target area. Approving this application will allow Sprint to best serve the needs residents of Chandler.

See attached propogation map for coverage maps and how this upgrade will benefit the local community.
