- Productivity enhancement through technology

Also during this retreat, the Consultant will work closely with the project steering committee to develop project prioritization criteria to objectively evaluate and prioritize technology projects. It is expected that these prioritization criteria will clearly reflect the linkage between the City's goals and objectives and IT initiatives. For example, the Consultant has used the following prioritization criteria in connection with past IT strategic plans:

- Enhanced stakeholder services
- Value enhancement (reduced cost and/or increase revenue)
- Increased productivity
- Organizational development (e.g., increases staff learning)
- Increase compliance

The Consultant will consider risk in terms of urgency (e.g., requirement to reduce the current risk of failure of an aging technology) and impact of the projects.

#### **5. Develop Preliminary Project Prioritization Process**

Based on the IT goals and preliminary project prioritization criteria defined in the previous task, the Consultant will develop a repeatable project review, approval and prioritization process and associated templates. The Consultant will propose refinements to the business needs request process to consider alignment with business initiatives as well as one time and ongoing resource requirements.

#### **6. Validate IT Project Portfolio**

The Consultant will work closely with the City's Chief Information Office and Information Technology Division's management team to review the existing IT project portfolio and add any necessary projects resulting from the IT assessment, stakeholder interviews or strategy development retreat.

#### **7. Conduct Validation Workshop**

The Consultant will conduct a second working session with the project steering committee to review and validate the IT project portfolio, and prioritize these projects based upon the preliminary prioritization process developed in Task 5. The Consultant will use the outcome of this workshop to refine the process and include the final results in the draft IT strategic plan.

The Consultant will also review best practice project implementation roles and responsibilities for inclusion in the final IT strategic plan.

#### **8. Develop Draft IT Strategic Plan**

The Consultant will develop a draft IT strategic plan to include:

- Executive summary
- Summary of planning methodology and approach
- IT vision, mission and goals
- Specific IT strategies, aligned with City goals
- Portfolio of IT projects, including project projects to support both citywide business initiatives and internal IT operational efficiencies

- Ongoing plan maintenance process
- Project review, approval and prioritization process and associated templates
- Project implementation and responsibilities

**9. Finalize IT Strategic Plan**

The Consultant will conduct a page-by-page walk through of the draft IT strategic plan and consolidated review comments from the City. Based upon this review, the Consultant will finalize the IT strategic plan.

**10. Present IT Strategic Plan**

The Consultant will present the final IT strategic plan to an audience of the City's choosing, typically the project steering committee, executive management or City Council.
