This project is for the removal of the failing vinyl fence surrounding the ADOT basins along Price Road North and South of W Calle Del Norte. The fence and associated gates, and other fence features shall be replaced with a wrought iron fence as specified in the same location.

This project requires the removal and disposal of the existing vinyl fence and any other dirt or debris associated with construction of this project. This is to be done in a manner so the basins are not open or accessible for extended periods. Contractor shall only remove that section which may be replaced within (5 days or less) at a time. Provide temporary fencing along exposed areas that are to be left open overnight.

The specified fence shall be commercial grade, 6' height, 3 rail, smooth top wrought iron fence. The fence shall be powder coated, satin black in color. Contractor shall provide wrought iron matching gates in matching locations where gates are associated with the existing vinyl fence.

The site to the North of Calle Del Norte is approximately 1778' linear feet in length, and 1036' linear feet to the south. The total fence length is approximately 2814' linear feet. Contractor shall verify measurements.

The fence specification shall include the following;

1. 3" Square, 11 gauge, posts. The posts shall be set 10' on center. The post shall be set in a concrete footing a minimal 10" by 24" depth.
2. 1" Square Pickets, 4 ½" on center.
3. 2" Square, 11 gauge, horizontal rails top and bottom with a ¾" x 1 ½", 16 gauge mid rail.  
The mid rail shall be located 1' below and parallel to the top rail.
4. All gates shall include;

- a. 4" square gate posts, 11 gauge, set in 12" x 36" depth concrete.
  - b. The size of the specified gates vary from the existing gates. Although essentially the location is to remain the same, north of Calle Del Norte shall get two (2) gates. The northern site has One - 16' Double Swing Gate, and one – 12' Double Swing gate. The southern site has one 16' double swing gate. Other materials are to match the proposed fence. The gate widths provided is the clear opening width. Coordinate gate locations with the City representative.
  - c. All gates shall have heavy duty guardian hinges, lockable latches, and drop rods, or approved equal.
5. All material shall be primed and painted electrostatically with a polyurethane top coat. This work may be done in the field.
  6. Concrete is to slope away from all posts and constructed in a manner so water doesn't accumulate around the posts.
  7. There shall be a maximum 2 ½" air space gap between grade and the bottom rail unless otherwise approved by the City.

The Contractor shall be responsible for any necessary staking, grading, engineering, traffic control, surveying, clearing, grounding, sprinkler repairs, and granite replenishment which may be associated with this project.

The Contractor is responsible for all coordination and necessary permitting with the Arizona Department of Transportation (ADOT). This includes but is not limited to an Encroachment Permit and Traffic Control Permits if required. All equipment, fencing, and other supplies are the responsibility of the contractor until acceptance. Storage, if required, shall be the responsibility of the contractor.

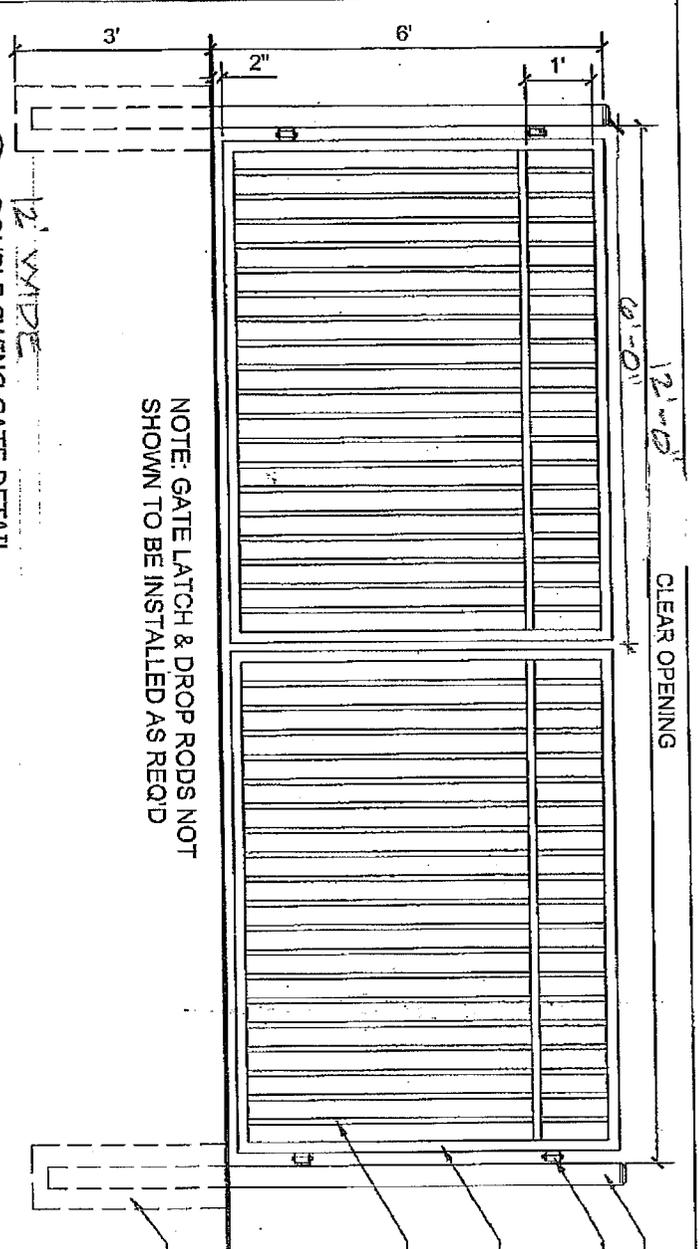

There is a 3' high vinyl fence section at the very northeast corner of the project that shall be removed and replaced. It should tie into the line and grade of the specified fence and existing low wall like the existing fence does. The 3' high fence length is approximately 27' long.
