

# Child and Family Safety Classes

## Keeping Kids Safe

During this four-hour session, expectant or new parents and caregivers will learn hands-on CPR and choking skills for adults, children and infants. Participants will also discover tips on how to keep their child safe at home.

## Safe Sitter®

Safe Sitter® is an eight-hour course that prepares young adolescents (ages 11-13) for the responsibilities of nurturing and protecting children and how to become skilled babysitters. Participants will learn about safety precautions, the developmental ages of children and the business of babysitting as well as CPR basics for children and infants and how to handle emergencies.

For more information about these classes including dates, locations and fees, or to register, please call ResourceLink at (480) 728-5414.
