

About the Park

Chandler's Veterans Oasis Park and Recharge facility are important components of the city's recreation and water resource management plans. A primary purpose is to provide a facility to recharge reclaimed water into the ground for later use. The city's Airport Water Reclamation Facility provides a supply of treated wastewater for distribution to the recharge basins in the east area of the park. The basins in turn provide an opportunity to develop riparian and wetland habitat for educational purposes and to attract wildlife. The City provides a wide variety of classes, programs, and special events at the Environmental Education Center (EEC). The EEC staff works with local school districts and scout programs to support education objectives for all grade levels. The park also provides a wide range of recreational opportunities with a community fishing lake, picnic pavilions, open play area and several miles of walking and biking trails.
