

# YOU Are The Solution to Stormwater Pollution

**Fact:** Stormwater does not receive formal treatment. Stormwater runoff and discharges of pollutants that enter the street end up into storm drains where they discharge into local landscaped retention basins, greenbelt areas, parks and community lakes within your neighborhood.

## How can you help?

- Report discharges that enter the street and storm drains by calling 480-782-3503
- Dispose of pool water in a sanitary sewer clean-out or maintain it on your property.
- Maintain vehicles to be leak free.
- Keep trash and other debris out of the storm drains.
- Pick up after your pets.
- Utilize the City's Household Hazardous Waste Collection Facility for proper recycling and disposal.
- Sweep yard debris and dispose of it properly, rather than blowing it into the street.
- Apply pesticides, herbicides and fertilizers per the manufacturer's directions.
- Adjust sprinkler heads and controller/timer to avoid overwatering and runoff entering the street.
- Have landscape materials delivered and maintained on private property and ensure that sediment and debris does not enter the street.
- Maintain your landscape to prevent erosion and reduce sediment from entering the street.
