

Three ways to save water and money this season

Switch to a Smart Irrigation Controller

A smart irrigation controller will automatically adjust to weather conditions, like rain, and provide up to 20% in water savings.

SRP customers are eligible to purchase a smart irrigation controller for up to 80% off the retail price by attending the free SRP Water Conservation Expo on March 4. Event registration opens mid-January. Register early to reserve your controller. For event and registration information, visit srp.net/2023expo.

Take a Water-Wise Workshop

The City of Chandler offers a variety of training workshops to teach residents how to make their yards more water efficient, beautiful and low maintenance. Each workshop is taught by an expert in their field. Starting in January, classes will focus on topics such as how to use smart controllers, how to compost, watering schedules for outdoor plants and much more.

Classes are free but require advance registration. Visit chandleraz.gov/WaterWorkshops for more info.

Rebates

The City of Chandler offers rebates to assist with the cost of outdoor water conservation measures.

Grass Removal (Landscape Conversion) Rebate – Up to \$3,000

Receive \$200 for every 1,000 square feet of grass removed, up to a maximum of \$3,000.

Smart Controller Rebate – Up to \$250

Receive a rebate of one-half the cost of a new controller.

New (Initial) Landscape Installation Rebate - \$200

A low water-use landscape installed at a new residence may be eligible for a \$200 rebate.
