

As part of the concept design phase, the City of Chandler requested public input on the development of Mesquite Groves Park as part of its ongoing efforts to create a community-centered space. In October 2024, a public meeting was held along with an online survey to gather valuable feedback from residents about the types of amenities they would like to see included in the park. Based on the input collected, the displayed information to the right summarizes the top amenities that are preferred by the community. Thank you for your input!

**Some Write-In Comments Included Support For:**
