

Go Blonde: Save money and save water!

Consider letting your Bermuda grass go blonde this winter by skipping overseeding. Allowing your lawn to go dormant is an easy and effective way to save resources.

Benefits of Going Blonde:

- **Conserve Water:** Save up to 12,000 gallons of water this winter and lower your monthly bill.
- **Cut Costs:** Avoid the expense of grass seed and fertilizer.
- **Reduce Maintenance:** Save time and money on installation and upkeep.

Interested in going blonde this winter or converting your landscape to xeriscape with vibrant, desert-adapted plants?

Chandler offers grass removal rebates for converting grass to a sustainable, low-maintenance yard.

Chandler Recycles and Reuses Every Drop of Water!

Did you know that every drop of water used indoors in Chandler is recycled and used again?

Reclaimed water has been treated to Class A+ water quality standards and is reused for irrigation and industrial purposes. Chandler also uses reclaimed water to keep our groundwater aquifer healthy. This water is delivered to Chandler's aquifer injection wells and recharge basins to help maintain healthy water levels underground.
