

What is a Watershed?

- A watershed is a land area that drains to a low point.
- The edges or boundaries of a watershed are the high points or mountains.
- We all live in a watershed and we manage the land (neighborhoods, farms forests, etc.) for the water quality and health of the people and ecosystem.

Chandler's surface water sources

- 1) Salt River watershed
- 2) Verde River watershed
- 3) Colorado River watershed
